INDEX

ABUNDANCE of commensal crabs of Chaetopterus, 353.
Accumulation of S-35 by organs and tissues of Lebistes, 183.
Acoel, cytology of egg of, 285.
Acteocina, as food for starfish, 265.
Actinocyclus, effect of temperature on growth and reproduction of, 255.
Activating substances, pigment, in cirripedes' central nervous system, 192.
Activity of melanophores in Sesarma, 337.
Adults, Drosophila, dopa-oxidizing activity in, 157.
Aedes, respiratory enzymes of, 129
Agnathan fishes, body water partitioning in, 238.
Algae, effect of temperature on growth and survival of, 255.
Amblystoma larvae, cell division in gastric mucosa of, 1.
Amphibians, responses of to TSH administration, 54.
Amphipod, lunar orientation of, 148.
Amphiprora, effect of temperature on survival and growth of, 255.
Amputation of Saccoglossus body regions, 118.
Anatomy of Cyathura, 62.
Anatomy of trematodes, 221.
Annelid, commensal crabs of, 353.
Annelid eggs, urethan treatment of, 384.
Annual testicular cycle of bobolink, in relation to photoperiodism, 140.
Antennae, role of in salinity reactions of crustaceans, 44.
Antennae of isopods, role of in humidity reactions, 38.
Antennules, role of in salinity reactions of crustaceans, 44.
Antennules of isopods, role of in humidity reactions, 38.
Anthurid isopod, systematics and distribution of, 62.
Antimitotic action of urethan, 384.
Aquatic isopods, humidity reactions of, 38.
Aquatic vertebrates, body water partitioning in, 238.
Arbacia sperm, ionic gradients in, 411.
Arbacia sperm and fertilizin, interactions between, 360.
Arthropod, pigment-activating substance in nervous system of, 192.
ASA-DORIAN, P. V. *See* K. S. NORRIS, 163.
Asellus, humidity reactions of, 38.
Asellus, salinity reactions of, 44.
Astropecten, food of, 265.
AUGENFELD, J. M., AND J. C. NEESS. Observations on the respiratory enzymes of various life-stages of Chironomus and Aedes, 129.
Avian testicular cycle, photoperiodism in relation to, 140.

BALANUS, decapod-pigment-activating substances in, 192.
Barnacles, decapod-pigment-activating substances in, 192.
Beak pigmentation in bobolink, as index of testicular cycle, 140.
Behavior, echo-location in porpoise, 163.
Behavior responses of isopods to humidity, 38.
Behavioral responses of crustaceans to salinity, 44.
Bermuda fishes, body water partitioning in, 238.
Birds, photoperiodism and annual testicular cycle of, 140.
Black pigment-dispersing substance from barnacles, 192.
Block, meiotic, in Triturus ovum, 29.
Blood group system for spiny dogfish, 401.
Blood volumes of fishes, 238.
Bobolink, photoperiodism and annual testicular cycle of, 140.
Body water, partitioning of, in Osteichthyes, 238.
Bottlenose porpoise, echo-location behavior in, 163.
Bottom sediment, role of in metamorphosis of Nassarius larvae, 92.
Brachydanio, origin of melanophores in, 206
Brackish-water crustaceans, salinity reactions of, 44.
BURBANCK, W. D. *See* M. A. MILLER, 62.

CALCIUM concentration, effect of on sea urchin larval skeleton formation, 177.
Carbohydrate of chick glycogen body, 348.

BALANUS, decapod-pigment-activating substances in, 192.
Barnacles, decapod-pigment-activating substances in, 192.
Beak pigmentation in bobolink, as index of testicular cycle, 140.
Behavior, echo-location in porpoise, 163.
Behavior responses of isopods to humidity, 38.
Behavioral responses of crustaceans to salinity, 44.
Bermuda fishes, body water partitioning in, 238.
Birds, photoperiodism and annual testicular cycle of, 140.
Black pigment-dispersing substance from barnacles, 192.
Block, meiotic, in Triturus ovum, 29.
Blood group system for spiny dogfish, 401.
Blood volumes of fishes, 238.
Bobolink, photoperiodism and annual testicular cycle of, 140.
Body water, partitioning of, in Osteichthyes, 238.
Bottlenose porpoise, echo-location behavior in, 163.
Bottom sediment, role of in metamorphosis of Nassarius larvae, 92.
Brachydanio, origin of melanophores in, 206
Brackish-water crustaceans, salinity reactions of, 44.
BURBANCK, W. D. *See* M. A. MILLER, 62.

CALCIUM concentration, effect of on sea urchin larval skeleton formation, 177.
Carbohydrate of chick glycogen body, 348.

Carbon monoxide, role of in respiratory exchange of Cecropia silkworm, 11.
Cecropia pupae, respiratory exchange of, 11.
Cell division, in urodele gastric mucosa, 1.
Cell size in marine fungus, 85.
Central nervous system of cirripedes, presence of pigment-activating substance in, 192.
Centrioles, orientation of in dividing cells, 285.
Cercariae of Stephanostomum, 221.
Cetaceans, echo-location behavior in, 163.
Chaetopterus, commensal crabs of, 353
Chaetopterus egg cleavage, effects of urethan on, 384.
Changes in abundance of commensal crabs of Chaetopterus, 353.
Chelonibia, decapod-pigment-activating substances from, 192.
Chemoreception of Nassarius larvae, 92.
Chemoreceptors of crustaceans, location of, 44.
CHIAKULAS, J. J., AND L. E. SCHEVING. The cyclic nature and magnitude of cell division in gastric mucosa of urodele larvae reared in the pond and laboratory, 1.
Chick glycogen body, carbohydrate composition of, 348.
Chironomus, respiratory enzymes of, 129.
Chiton, development of, 313.
Chlorophyceae, effects of temperature on survival and growth of, 255.
Chondrichthyes, body water partitioning in, 238.
Chorion formation in Chiton, 313.
Chromatography of chick glycogen body, 348.
Chromatophorotropins in cirripede nervous system, 192.
Chromatophorotropins in Sesarma, 337.
Chromosomes of Chiton, 313.
Chromosomes of Rhizocephala, 272.
Chrysophyceae, effects of temperature on growth and survival of, 255.
Chymotrypsin, effects of on cleavage of urethan-treated Chaetopterus eggs, 384.
Cirripedia, presence of pigment-activating substances in nervous system of, 192.
Cleavage of Chaetopterus eggs, effects of urethan on, 384.
Cleavage of Polychoerus eggs, 285.
Cold, effect of on cell size of fungus, 85.
Cold, effect of on growth and survival of algae, 255.
Color changes in Sesarma, 337.
Commensal crabs of Chaetopterus, 353.
Comparison of responses of salamanders to TSH hormone administration, 54.
Comparison of transequatorial and Temperate Zone bird migrants, with respect to testicular cycles, 140.
Composition of chick glycogen body, 348.
Compound eye, electrophysiology of, 375.
Cortical rigidity of urethan-treated Chaetopterus eggs, 384.
COSTELLO, D. P. On the orientation of centrioles in dividing cells, and its significance: a new contribution to spindle mechanics, 285.
COSTLOW, J. D. *See* M. I. SANDEEN, 192.
COWDEN, R. R. A cytochemical investigation of oögenesis and development to the swimming larval stage in Chiton, 313.
Crab, ectoparasite of, 272.
Crab, melanophores of, 337.
Crabs, commensal, of Chaetopterus, 353.
Crustacean, estuarine, systematics and distribution of, 62.
Crustacean, melanophores of, 337.
Crustacean, pigmentary responses of, 192.
Crustacean commensals of Chaetopterus, 353.
Crustaceans, salinity reactions of, 44.
Cultural variation, effect of on cell size of marine fungus, 85.
Cunner, origin of melanophores in, 206.
Cyanide, effect of on respiration of dipterans, 129.
Cyathura, systematics and distribution of, 62.
Cycle, testicular, of bobolink, in relation to photoperiodism, 140.
Cyclic nature of mitoses in urodele gastric mucosa, 1.
Cytochemistry of Chiton development, 313.
Cytochrome oxidase of dipterans, 129.
Cytochrome oxidase system of Cecropia pupae, 11.
Cytological study of origin of teleost melanophores, 206.
Cytology of Chiton development, 313.
Cytology of Polychoerus, 285.
Cytology of Rhizocephala, 272.
Cytology of urethan-treated Chaetopterus eggs, 384.

DARKNESS, role of in orientation of amphipods, 148.
Day-length, in relation to testicular cycle of birds, 140.
Decapod-pigment-activating substances in cirripede central nervous system, 192.
DE GENNARO, L. D. The carbohydrate composition of the glycogen body of the chick embryo as revealed by paper chromatography, 348.
DENT, J. N. *See* W. G. LYNN, 54.
Desmognathus, responses of to TSH administration, 54.
Determination of sex in Rhizocephala, 272.
Development of Chiton, 313.
Development of melanophores in fishes, 206.

Development of spicules in sea urchin larvae, 177.
Developmental stages of Stephanostomum, 221.
Diapausing Cecropia pupae, respiratory exchange of, 11.
Diatoms, effects of temperature on growth and survival of, 255.
Diemyctylus, responses of to TSH administration, 54.
Differences, sex, in dopa-oxidizing activity of Drosophila, 157.
Differentiation of Chiton, 313.
Dihydroxyphenylalanine-oxidizing activity of Drosophila, 157.
Dipteran, dopa-oxidizing activity in, 157.
Dipterans, respiratory enzymes of, 129.
Discrimination in porpoise, 163.
Distribution of cyathurans, 62.
Distribution of Stephanostomum, 221.
Dividing cells, orientation of centrioles in, 285.
Division, cell, in urodele gastric mucosa, 1.
Division of Chaetopterus egg, effects of urethan on, 384.
Dogfish, blood group system for, 401.
Dolichonyx, photoperiodism and annual testicular cycle of, 140.
Dopa-oxidizing activity of Drosophila, 157.
Drosophila, dopa-oxidizing activity in, 157.
Dugesia, effect of goitrogens on respiration of, 370.
DUNHAM, P. B. *See* H. B. STEINBACH, 411.

ECHINODERM, food of, 265.
Echinoderm, growth rate of, 420.
Echinoderm larvae, skeleton formation in, 177.
Echinoderm sperm, ionic gradients in, 411.
Echinoderm sperm and fertilizin, interactions between, 360.
Echo-location in porpoise, 163.
Ecological association of Chaetopterus and commensal crabs, 353.
Ecological implications of body water partitioning in Osteichthyes, 238.
Ecology of Cyathura, 62.
Ecology of dipterans, in relation to respiratory enzymes, 129.
Ecology of isopods, in relation to humidity, 38.
Ecology of isopods, in relation to salinity, 44.
Ecology of Nassarius, 92.
Effect of calcium and magnesium concentrations on skeleton formation in sea urchin larvae, 177.
Effect of temperature on growth and survival of algae, 255.
Effects of cultural variation on cell size of marine fungus, 85.
Effects of urethan on cleavage of Chaetopterus egg, 384.
Egg, Chaetopterus, effects of urethan on cleavage of, 384.
Egg, Chiton, development of, 313.
Egg, Polychoerus, cytology of, 285.
Egg, Triturus, meiotic block in, 29.
Egg-size in Peltogasterella, 272.
Eggs, inhibitory effect of on dipteran succinoxidase system and rat liver, 129.
Elasmobranch, blood group system for, 401.
Electrophysiology of Lucilia eye, 375.

Photoreceptor cell response in Lucilia eye, 375.
Phylogenetic implications of body water partitioning in Osteichthyes, 238.
Physiology of Sesarma melanophores, 337.
Physiology of vinegar eel, 326.
Phytoplankton, effect of temperature on survival and growth of, 255.
Pigment-activating substances in cirripede nervous system, 192.
Pigment activity in Sesarma, 337.
Pigment cells, origin of in fishes, 206.
Pigmentation of bobolink beak, as index of testicular cycle, 140.
Pinnixa, changes of abundance in, 353.
Planarians, respiration of, 370.
Platyhelminth, cytology of, 285.
Platyhelminth, life-history and morphology of, 221.
Platyhelminth, respiration of, 370.
Polychoerus, cytology of, 285.
Polyonyx, changes in abundance of, 353.
Pond-reared salamander larvae, cell division in, 1.
Populations of dogfish, blood groups in, 401.
Porpoise, echo-location behavior in, 163.
Prawns as test animals for pigment-activating substances from barnacles, 192.
PRESCOTT, J. H. *See* K. S. NORRIS, 163.
Proteins, distribution of in development of Chiton, 313.
Pulse rates of fishes, 238.
Pupae, Cecropia, respiratory exchange of, 11.
Pupae of dipterans, respiratory enzymes of, 129.
Pupation rates in Drosophila, 157.

RADIOCARBON, use of in studies on Cecropia pupal respiratory exchange, 11.
Radiocarbon, use of in study of sperm ionic gradients, 411.
Radioiodine, responses of salamanders to, 54.
Radiostrontium, movement of across trout gills, 110.
Radiosulfur, uptake and turnover of by Lebistes, 183.
Radiosulfur, use of in study of sperm ionic gradients, 411.
Radiosulfur as label for Arbacia fertilizin, 360.

Rainbow trout, movement of strontium across gills of, 110.
Ratio of calcium to magnesium, role of in skeleton formation of sea urchin larvae, 177.
Reactions, salinity, of crustaceans, 44.
Reactions of isopods to humidity, 38.
READ, C. P. *See* H. A. ELLS, 326.
Receptors, humidity, of isopods, 38.
Receptors, salinity, of isopods, 44.
Red-pigment-concentrating substance from barnacles, 192.
Redia of Stephanostomum, 221.
Regeneration in Saccoglossus, 118.
Regional differences in abundance of Chaetopterus commensal crabs, 353.
Respiration rates in planarians, 370.
Respiration of vinegar eel, 326.
Respiratory enzymes of Chironomus and Aedes, 129.
Respiratory exchange of Cecropia pupae, 11.
Respiratory movements of fishes, 238.
Response, photoreceptor cell, in Lucilia eye, 375.
Responses of salamanders to TSH administration, 54.
Retinal pigment-activating substances from barnacles, 192.
Retinula cell response in Lucilia, 375.
Rhythms of melanophore activity in Sesarma, 337.
Rhythms in Orchestoidea, 148.
